CAMPO SAN GIORGIO

Conero Riserva Docg

Preview launch at the end of 2013, the decision to make a wine with the characteristics of **CAMPO SAN GIORGIO**, our **NEW Conero Riserva Docg - 2009 vintage**, has been taken long time ago.

Since few years we've had a desire: to enhance the Conero area, a beautiful and vocated land but also still unknown and not fully understood. We were convinced, in fact, that Montepulciano grapes grown on this "terroir" had not express yet the whole potential of making great wines.

"With this red" Michele Bernetti explains "we fix indeed a benchmark within the production of all Montepulciano from this area, standing out as real reference product and also highlighting the so different style, much more silky and soft, compared to the greatest Montepulciano wines from Abruzzo.

A pure Montepulciano showing deep elegance and silky tannins, thanks to the ageing on the yeast and followed by one year in barrique and six months in tonneau".

The chosen name wants to highlight the strong connection with a unique territory: Campo San Giorgio is in fact the exact little piece of land, which has registered track on the back label, in Osimo municipality. Land that has clearly distinguished after some experimentation harvests, for its unique character and potential.

The label has old roots too: it is a handmade design finding its inspiration from that one used at the end of the Sixties for our Rosso Conero and represents the vines, Camerano village and the Conero Mountain surrounding.

A long walk then for this 1st production, the 2009, that we strictly wanted to keep limited: only 2814 bottles that we would like to offer to our most loyal customers.
